

List of Figures

2.1	General Watermarking Framework	17
2.2	Basic Diagram of LBP Operator	23
2.3	Standard images used in our experiment	29
3.1	Schematic diagram of watermark embedding phase in RWS-WM	36
3.2	Numerical illustration of watermark embedding phase in RWS-WM	38
3.3	Schematic diagram of watermark extraction phase in RWS-WM	40
3.4	Numerical illustration of watermark extraction phase in RWS-WM.	42
3.5	Color watermark image (logo) with different size used in RWS-WM	42
3.6	Graphical representation of PSNR (dB) versus block size in RWS-WM	46
3.7	Graphical representation of PSNR (dB) versus number of images in RWS-WM	46
3.8	Comparison graph in terms PSNR (dB) with existing schemes in RWS-WM	48
3.9	Comparison graph in terms of payload (bpp) with existing schemes in RWS-WM	49
3.10	Graphical representation of various images with respect to SD and CC in RWS-WM	50
3.11	Tampered results on USC-SIPI image database [90] in RWS-WM	50
3.12	Tampered results on UCID image database [61] in RWS-WM	51
3.13	Tampered results on HDR image database [26] in RWS-WM	51
3.14	Tampered results on STARE image database [89] in RWS-WM	52
3.15	Experimental results under brute force attack in RWS-WM	53
3.16	Block diagram of watermarking process in RWS-CA	55
3.17	Numerical illustration of watermark embedding phase of RWS-CA	56
3.18	Numerical illustration of watermark extraction phase of RWS-CA	58
3.19	Pictorial results of output images in RWS-CA	61
3.20	Watermark image (logo) with different size used in RWS-CA	62

3.21	Graphical representation of PSNR (dB) on UCID image database [61] in RWS-CA	63
3.22	Comparison graph in terms PSNR (dB) with existing schemes in RWS-CA . . .	66
3.23	Effect of salt pepper noise on Lena image in RWS-CA	69
3.24	Effect of cropping attacks on Lena image in RWS-CA	70
3.25	Effect of copy move forgery attacks on Lena image in RWS-CA	71
3.26	Effects of different types of attacks on Lena image for RWS-WM	72
3.27	Effects of different types of attacks on Lena image for RWS-CA	73
4.1	Block diagram of watermarking process in DRWS-LBP.	78
4.2	Numerical illustration of watermark embedding phase in DRWS-LBP	79
4.3	Numerical illustration of watermark extraction phase in DRWS-LBP	81
4.4	Pictorial results of output images in DRWS-LBP	83
4.5	Watermark image (logo) with different size used in DRWS-LBP	83
4.6	Comparison graph in terms of PSNR (dB) with dual image based existing schemes in DRWS-LBP	86
4.7	Comparison result with LBP based existing schemes in terms of PSNR (dB) in DRWS-LBP	87
4.8	Effect of salt pepper noise on Lena image in DRWS-LBP	89
4.9	Effect of cropping attacks on Lena image in DRWS-LBP	90
4.10	Effect of copy-move forgery attacks on Lena image in DRWS-LBP	91
4.11	Block diagram of image interpolation phase in RWS-LBP-HC	94
4.12	Block diagram of watermarking process RWS-LBP-HC	95
4.13	Numerical illustration of watermark embedding phase in RWS-LBP-HC	96
4.14	Numerical illustration of watermark embedding phase in RWS-LBP-HC	98
4.15	Pictorial results of output images in RWS-LBP-HC	100
4.16	Watermark images (logo) with different size used in RWS-LBP-HC	100
4.17	Comparison graph in terms of capacity with existing schemes in RWS-LBP-HC	103
4.18	Comparison graph in terms of PSNR (dB) with existing schemes in RWS-LBP-HC	103
4.19	Comparison result with LBP based existing schemes in terms of PSNR (dB) in RWS-LBP-HC	104
4.20	Effect of salt pepper noise on Lena image in RWS-LBP-HC	106
4.21	Effect of cropping attacks on Lena image in RWS-LBP-HC	107

4.22	Effect of copy move forgery attacks on Lena image in RWS-LBP-HC	108
4.23	Effects of different types of attacks on Lena image for DRWS-LBP.	109
4.24	Effects of different types of attacks on Lena image for RWS-LBP-HC.	109
5.1	Block diagram of watermarking process in RWS-LBP-CA.	115
5.2	Numerical illustration of watermark embedding phase in RWS-LBP-CA.	116
5.3	Numerical illustration of watermark extraction phase in RWS-LBP-CA.	118
5.4	Watermark images (logo) with different size used in RWS-LBP-CA	120
5.5	Pictorial results of output images in RWS-LBP-CA	121
5.6	Comparison graph in terms of PSNR (dB) with RWS based existing methods in RWS-LBP-CA	124
5.7	Graphical representation of PSNR (dB) on UCID image database [61] in RWS- LBP-CA	125
5.8	Comparison graph in terms of PSNR (dB) with LBP based existing schemes in RWS-LBP-CA	126
5.9	Effect of salt and pepper noise on Lena image in RWS-LBP-CA	128
5.10	Effect of cropping attacks on Lena image in RWS-LBP-CA	128
5.11	Effect of copy-move forgery on Lena image in RWS-LBP-CA	129
5.12	Block diagram of watermarking process in RWS-LBP-WM-LIP	131
5.13	Schematic diagram of sub-sample generation and interpolation process in RWS- LBP-WM-LIP	132
5.14	Numerical illustration of watermark embedding phase in RWS-LBP-WM-LIP .	133
5.15	Numerical illustration of watermark extraction phase in RWS-LBP-WM-LIP .	136
5.16	Watermark images (logo) with different size used in RWS-LBP-WM-LIP . . .	137
5.17	Pictorial results of output images in RWS-LBP-WM-LIP	138
5.18	Graphical representation of PSNR (dB) on UCID image database [61] in RWS- LBP-WM-LIP	140
5.19	Comparison graph in terms of PSNR (dB) with RWS based existing methods in RWS-LBP-CA	142
5.20	Effect of salt pepper noise on Lena image in RWS-LBP-WM-LIP	146
5.21	Effect of cropping attacks on Lena image in RWS-LBP-WM-LIP	147
5.22	Effect of copy-move forgery on Lena image in RWS-LBP-WM-LIP	148

5.23	Effects of different types of attacks on Lena image for RWS-LBP-CA.	149
5.24	Effects of different types of attacks on Lena image for RWS-LBP-WM-LIP. . .	150
6.1	Graphical representation of proposed schemes with respect to PSNR (dB) . . .	156
6.2	Comparison of proposed schemes with respect to Payload (bpp)	157
6.3	Comparison of proposed schemes with respect to watermark embedding capac- ity (bits)	157
6.4	Comparison of proposed schemes with respect to PSNR (dB) and Payload (bpp)	158
6.5	Comparison of proposed schemes with respect to Attacks	158
