

LIST OF FIGURES

Figure 3.1 <i>S. obtusifolia</i> growing in wild field	32
Figure 3.2 <i>S. obtusifolia</i> growing in	32
Figure 3.3 <i>S. obtusifolia</i> growing in	32
Figure 3.4 <i>S. obtusifolia</i> seedlings showing germination in the experimental field...	33
Figure 3.5 <i>S. obtusifolia</i> from different provenances in the experimental field	33
Figure 3.6 <i>S. obtusifolia</i> young plants in the experimental field.....	34
Figure 3.7 <i>S. obtusifolia</i> in buds, flowers and pods grown in the experimental field	35
Figure 3.8 Mature <i>S. obtusifolia</i> plants in the experimental field	36
Figure 3.9 Growth patterns of <i>S. obtusifolia</i> of 20 accessions.....	38
Figure 3.10 Flowering curve of <i>S. obtusifolia</i> of 20 accessions.....	41
Figure 3.11 Fruiting performance of 20 accessions of <i>S. obtusifolia</i>	44
Figure 3.12 Clustering of <i>S. obtusifolia</i> accessions based on phenological characteristics.....	48
Figure 4.1 Matured <i>S. obtusifolia</i>	54
Figure 4.2 Root of <i>S. obtusifolia</i>	55
Figure 4.3 Leaf of <i>S. obtusifolia</i>	56
Figure 4.4 Flower of <i>S. obtusifolia</i>	57
Figure 4.5 Pods of <i>S. obtusifolia</i>	58
Figure 4.6 Plant heights of <i>S. obtusifolia</i> of 20 accessions.....	62
Figure 4.7 Root lengths of <i>S. obtusifolia</i> of 20 accessions	62

Figure 4.8 Number of branches of <i>S. obtusifolia</i> of 20 accessions	63
Figure 4.9 Internode lengths of <i>S. obtusifolia</i> of 20 accessions	63
Figure 4.10 Girth of <i>S. obtusifolia</i> of 20 accessions.....	64
Figure 4.11 Leaflet (top) lengths of <i>S. obtusifolia</i> of 20 accessions	64
Figure 4.12 Leaflet (top) widths of <i>S. obtusifolia</i> of 20 accessions	65
Figure 4.13 Rachis with petiole lengths of <i>S. obtusifolia</i> of 20 accessions	65
Figure 4.14 Stipule lengths of <i>S. obtusifolia</i> of 20 accessions.....	66
Figure 4.15 Stipel lengths of <i>S. obtusifolia</i> of 20 accessions.....	66
Figure 4.16 Bract lengths of <i>S. obtusifolia</i> of 20 accessions	67
Figure 4.17 Pedicel lengths of <i>S. obtusifolia</i> of 20 accessions	67
Figure 4.18 Sepal lengths of <i>S. obtusifolia</i> of 20 accessions	68
Figure 4.19 Petal lengths of <i>S. obtusifolia</i> of 20 accessions	68
Figure 4.20 Anther lengths of <i>S. obtusifolia</i> of 20 accessions	69
Figure 4.21 Filament lengths of <i>S. obtusifolia</i> of 20 accessions	69
Figure 4.22 Pistil lengths of <i>S. obtusifolia</i> of 20 accessions.....	70
Figure 4.23 Number of Flowers per Plant of <i>S. obtusifolia</i> of 20 accessions.....	70
Figure 4.24 Number of Pods per Plant of <i>S. obtusifolia</i> of 20 accessions.....	71
Figure 4.25 Pod lengths of <i>S. obtusifolia</i> of 20 accessions.....	71
Figure 4.26 Number of seeds per pod of <i>S. obtusifolia</i> of 20 accessions	72
Figure 4.27 Seed weights of <i>S. obtusifolia</i> of 20 accessions	72
Figure 4.28 Correlation plot of morphological characteristics of <i>S. obtusifolia</i>	77

Figure 4.29 Principal components and their cumulative proportion of variance.....	81
Figure 4.30 Classification of <i>S. obtusifolia</i> based on morphological characteristics.	83
Figure 5.1 Metaphase karyotype plate and ideogram from the germinated root tip of the accession ASN (Asansol).....	95
Figure 5.2 Metaphase karyotype plate and ideogram from the germinated root tip of the accession BDG (Bandhavgarh)	96
Figure 5.3 Metaphase karyotype plate and ideogram from the germinated root tip of the accession BNP (Bishnupur)	97
Figure 5.4 Metaphase karyotype plate and ideogram from the germinated root tip of the accession BPR (Bolpur).....	98
Figure 5.5 Metaphase karyotype plate and ideogram from the germinated root tip of the accession DHD (Dahod)	99
Figure 5.6 Metaphase karyotype plate and ideogram from the germinated root tip of the accession DHN (Dehradun)	100
Figure 5.7 Metaphase karyotype plate and ideogram from the germinated root tip of the accession DNG (Devendranagar).....	101
Figure 5.8 Metaphase karyotype plate and ideogram from the germinated root tip of the accession GBP (Gobindapur).....	102
Figure 5.9 Metaphase karyotype plate and ideogram from the germinated root tip of the accession HDR (Haridwar)	103
Figure 5.10 Metaphase karyotype plate and ideogram from the germinated root tip of the accession JBP (Jabalpur).....	104
Figure 5.11 Metaphase karyotype plate and ideogram from the germinated root tip of the accession JPR (Jaipur)	105
Figure 5.12 Metaphase karyotype plate and ideogram from the germinated root tip of the accession JRM (Jhargram)	106

Figure 5.13 Metaphase karyotype plate and ideogram from the germinated root tip of the accession KLN (Kalyani).....	107
Figure 5.14 Metaphase karyotype plate and ideogram from the germinated root tip of the accession KPR (Kharagpur).....	108
Figure 5.15 Metaphase karyotype plate and ideogram from the germinated root tip of the accession LKP (Lakshmikantapur).....	109
Figure 5.16 Metaphase karyotype plate and ideogram from the germinated root tip of the accession MGL (Mangalore).....	110
Figure 5.17 Metaphase karyotype plate and ideogram from the germinated root tip of the accession NGP (Nagpur).....	111
Figure 5.18 Metaphase karyotype plate and ideogram from the germinated root tip of the accession PRL (Purulia).....	112
Figure 5.19 Metaphase karyotype plate and ideogram from the germinated root tip of the accession RPR (Raipur).....	113
Figure 5.20 Metaphase karyotype plate and ideogram from the germinated root tip of the accession TNG (Tatanagar).....	114
Figure 5.21 Polyploidy of <i>S. obtusifolia</i>	117
Figure 5.22 Karyotype asymmetry of <i>S. obtusifolia</i> of twenty accessions.....	119
Figure 6.1 Polyketide pathway for the biosynthesis of anthraquinones	124
Figure 6.2 Pathway of rhein	126
Figure 6.3 Molecular structure of Rhein.....	127
Figure 6.4 Chromatogram of standard rhein solution of concentration of 5 µg/ml .	136
Figure 6.5 Chromatogram of standard rhein solution of concentration of 10 µg/ml	136
Figure 6.6 Chromatogram of standard rhein solution of concentration of 20 µg/ml	137

Figure 6.7 Chromatogram of standard rhein solution of concentration of 40 µg/ml	137
Figure 6.8 Calibration curve generated from chromatogram of standard rhein solution	138
Figure 6.9 Chromatogram of extracted rhein solution from the leaves of the plants of the accession ASN (Asansol).....	140
Figure 6.10 Chromatogram of extracted rhein solution from the leaves of the plants of the accession BDG (Bandhavgarh)	140
Figure 6.11 Chromatogram of extracted rhein solution from the leaves of the plants of the accession BNP (Bishnupur)	141
Figure 6.12 Chromatogram of extracted rhein solution from the leaves of the plants of the accession BPR (Bolpur).....	141
Figure 6.13 Chromatogram of extracted rhein solution from the leaves of the plants of the accession DHD (Dahod)	142
Figure 6.14 Chromatogram of extracted rhein solution from the leaves of the plants of the accession DHN (Dehradun)	142
Figure 6.15 Chromatogram of extracted rhein solution from the leaves of the plants of the accession DNG (Devendranagar).....	143
Figure 6.16 Chromatogram of extracted rhein solution from the leaves of the plants of the accession GBP (Gobindapur).....	143
Figure 6.17 Chromatogram of extracted rhein solution from the leaves of the plants of the accession HDR (Haridwar)	144
Figure 6.18 Chromatogram of extracted rhein solution from the leaves of the plants of the accession JBP (Jabalpur).....	144
Figure 6.19 Chromatogram of extracted rhein solution from the leaves of the plants of the accession JPR (Jaipur)	145

Figure 6.20 Chromatogram of extracted rhein solution from the leaves of the plants of the accession JRM (Jhargram)	145
Figure 6.21 Chromatogram of extracted rhein solution from the leaves of the plants of the accession KLN (Kalyani).....	146
Figure 6.22 Chromatogram of extracted rhein solution from the leaves of the plants of the accession KPR (Kharagpur).....	146
Figure 6.23 Chromatogram of extracted rhein solution from the leaves of the plants of the accession (Lakshmikantapur).....	147
Figure 6.24 Chromatogram of extracted rhein solution from the leaves of the plants of the accession MGL (Mangalore).....	147
Figure 6.25 Chromatogram of extracted rhein solution from the leaves of the plants of the accession NGP (Nagpur).....	148
Figure 6.26 Chromatogram of extracted rhein solution from the leaves of the plants of the accession PRL(Purulia).....	148
Figure 6.27 Chromatogram of extracted rhein solution from the leaves of the plants of the accession RPR (Raipur)	149
Figure 6.28 Chromatogram of extracted rhein solution from the leaves of the plants of the accession TNG (Tatanagar).....	149
Figure 6.29 Chart for extracted rhein quantity in microgram per gram of dried leaf against the accessions.	150
Figure 6.30 Clustering of <i>S. obtusifolia</i> of 20 accessions based on the quantity of rhein extracted from dried leaf.....	154
Figure 6.31 ESI MS spectrum of <i>S. obtusifolia</i> sample solution	157
Figure 7.1 <i>S. obtusifolia</i> Genomic DNA quantification on agarose gel	163
Figure 7.2 Pre-amplification of adaptor ligated libraries.....	164

Figure 7.3 DNA Fingerprint (AFLP Primer Pair E-AAC/M-CAG).....	169
Figure 7.4 DNA Fingerprint (AFLP Primer Pair E-AAC/M-CTA).....	170
Figure 7.5 DNA Fingerprint (AFLP Primer Pair E-ACA/M-CAG).....	171
Figure 7.6 DNA Fingerprint (AFLP Primer Pair E-ACA/M-CTA).....	172
Figure 7.7 DNA Fingerprint (AFLP Primer Pair E-ACT/M-CAG).....	173
Figure 7.8 DNA Fingerprint (AFLP Primer Pair E-ACT/M-CTA)	174
Figure 7.9 DNA Fingerprint (AFLP Primer Pair E-AG/M-CAG)	175
Figure 7.10 DNA Fingerprint (AFLP Primer Pair E-AG/M-CTA).....	176
