Contents	XII
List of Tables	XVIII
List of Figures	XIX
Abbreviations	XXIV
Chapter 1. Introduction	1-82
1.1 History and background of magnetism	1
1.2 Magnetic moment due electronic spin	4
1.3 Magnetic Domain	9
1.4 Classification of magnetism	10
1.4.1 Diamagnetism	10
1.4.2 Paramagnetism	13
1.4.3 Ferromagnetism	16
1.4.4 Antiferromagnetism	20
1.4.5 Ferrimagnetism	23

1.4.6	Superparamagnetism	25
1.5	Magnetic Anisotropy	27
1.5.1	Magneto Crystalline Anisotropy	28
1.5.2	Shape Anisotropy	30
1.5.3	Surface Anisotropy	30
1.5.4	Induced Magnetic Anisotropy	31
1.6	Magnetic Exchange Interactions	31
1.6.1	Direct Exchange Interaction	31
1.6.2	Indirect or Superexchange Interaction	32
1.6.3	RKKY Exchange Interaction	32
1.6.4	Double Exchange Interaction	33
1.6.5	Anisotropic Exchange Interaction	33
1.7	Ferrimagnetic Materials or Ferrites	34
1.8	Classification of Ferrite	35
(A)	Classification of Ferrite: Based on Magnetic Coercivity	35
(i)	Soft Ferrite	35
(ii)	Hard Ferrite	36
(B)	Classification of Ferrite: Based on Crystal Structure	37
(i)	Spinel Ferrite	37
(ii)	Garnet	38
(iii)	Hexagonal Ferrite	39
(iv)	Ortho Ferrite	40
1.9	Structure and Chemistry of Spinel Ferrite	41

1.10	Cation distribution in Spinel Ferrite	47
1.11	Néel's Theory of Ferrimagnetism	48
1.12	Yafet-Kittel Theory of Ferrimagnetism	53
1.13	Application of Ferrite	56
1.14	Literature Review	61
1.15	Aim of Present Work	82
Chapter 2. Theoretical Background		83-112
2.1	Introduction	83
2.2	Synthesis techniques	84
2.2.1	Solid state reaction method	84
2.2.2	Sol-gel auto combustion technique	85
2.2.3	Hydrothermal technique	86
2.2.4	Citrate precursor technique	88
2.2.5	Co-precipitation technique	89
2.2.6	Spray pyrolysis method	90
2.3	Structural analysis	91
2.3.1	X-ray diffraction	91
2.3.1.1	Indexing and crystal structure	92
2.3.1.2	Lattice parameter	93
2.3.1.3	Crystalline size	93
2.3.1.4	X-ray density	94
2.3.1.5	Bulk density	94
2.3.1.6	Porosity	94

2.4	Dielectric properties	95
2.4.1	Dielectric constant	95
2.4.1	Dielectric loss tangent	98
2.5	Complex impedance spectroscopy	99
2.6	Electric modulus	100
2.7	Electrical conductivity	102
2.8	Magnetic properties	105
2.8.1	Saturation magnetization (M_s)	106
2.8.2	Curie temperature (T_C)	108
2.8.3	Initial permeability	108
2.8.4	Magnetic hysteresis	110
Chapter 3. Experimental Techniques		113-130
3.1	Introduction	113
3.2	Sample synthesis	114
3.2.1	Solid state reaction method	114
(a)	Starting compounds	115
(b)	Weighing	116
(c)	Grinding	116
(d)	Pre-sintering	116
(e)	Grinding	116
(f)	Pelletize	117
(g)	Sintering	117
3.3	Crystal structure: X-ray diffraction	117

3.4	Dielectric and electrical measurement	121
3.5	Magnetic measurement	123
3.5.1	Vibrating sample magnetometer (VSM)	123
3.5.2	Superconducting quantum interference device (SQUID)	126
3.5.3	Field cooled (FC) and zero field cooled (ZFC) measurement	127
3.5.4	Initial permeability	129
Chapter 4. Synthesis and Study the Effect of Mo Doping On the Structural and Dielectric Properties of Co-Zn Ferrite		131-146
4.1	Introduction	131
4.2	Synthesis	133
4.3	Structural properties	135
4.4	Dielectric properties	137
4.4.1	Dielectric constant	137
4.4.2	Dielectric loss tangent	143
Chapter 5. Impedance Spectroscopy and Electric Modulus Behavior of Molybdenum Doped Cobalt Zinc Ferrite		147-160
5.1	Introduction	147
5.2	Complex impedance spectroscopy	149
5.3	Electric modulus formalism	154
Chapter 6. AC and DC Electrical Conductivity and Magnetic Properties of $\text{Co}_{0.65}\text{Zn}_{0.35}\text{Fe}_{2-x}\text{Mo}_x\text{O}_4$ (x=0.0, 0.1 And 0.2) Ferrites		161-172
6.1	Introduction	161
6.2	AC conductivity	163

6.2.1	Frequency dependence	163
6.2.2	Temperature dependence	168
6.3	Magnetization study	170
	Conclusion	173
	Summary	176
	Bibliography	179
