

List of Figures

- Figure 1.1.** Microbial exo-polysaccharide (EPS) production
- Figure 1.2.** Various applications of fungal EPS
- Figure 2.1.** General scheme of heavy metals removal by fungal cell
- Figure 2.2.** General scheme of bioaccumulation of heavy metals by fungal system
- Figure 2.3.** Eco-management and eco-monitoring by detritus food chain including fungi
- Figure 4.1.** Collection of soil samples from different sampling sites
- Figure 4.2.** MPN index analysis by test tubes method
- Figure 4.3.** Isolation of fungal strains from soil sample in laminar air flow hood in university laboratory
- Figure 4.4.** Experimental setup for studying heavy metal tolerance activities of F12 fungus in liquid culture
- Figure 4.5.** Production and collection of EPS in liquid culture broth
- Figure 4.6.** Fungal growth culture with different concentrations of heavy metals in agar plates
- Figure 4.7.** Production of fungal metabolites from F12 strain
- Figure 4.8.** Schematic presentation of the entire study undertaken emphasizing for eco-monitor of the selected eco-system
- Figure 5.1.** Location map of Subarnarekha river basin, India
- Figure 5.2.** Representation of selected study sites (SI, S-II and S-III)
- Figure 5.3.** Sampling from study sites of Subarnarekha river basin
- Figure 5.4.** Various non-point sources of pollution
- Figure 5.5.** Various point sources of pollution a. smoke discharge from the industries. b. Stock up of industrial waste water.
- Figure 5.6.** Distribution of fungi at three different study sites
- Figure 5.7.** Identification of fungal strains under phase contrast microscope
- Figure 5.8.** Isolation of fungi in potato dextrose agar medium

Figure 5.9. Genus wise distribution of fungal strains by radar chart

Figure 5.10. Isolation method of metal tolerant fungi

Figure 5.11. Isolation of heavy metal tolerant fungi at different metal concentrations

Figure 5.12. F12 strain in PDA media (a), morphological structure of F12 strain under light microscope (b)

Figure 5.13. Phylogenetic analysis of identified F12 strain

Figure 5.14. Tolerance indices of fungi against Pb (II) (500 mg/l) (a) and Cd (II) (500mg/l)

Figure 5.15. Heavy metal removal percentage with biomass concentration

Figure 5.16. Heavy metal removal percentage by fungal EPS

Figure 5.17. Minimum inhibitory concentrations of different fungi

Figure 5.18. Effect of pH (a), incubation time (b), temperature (c) and biomass concentration (d) on the biosorption of Pb (II) and Cd (II) in respect of biomass and exo-polysaccharides (EPS)

Figure 5.19. The 3D-plots showing the most important interactions, (a) between pH and time; (b) between pH and temperature; (c) between time and temperature

Figure 5.20. Identification by Light Microscope (a), (b); Phase contrast microscope (c), (d) of *Aspergillus penicillioides*

Figure 5.21. Electron microscopic view of cultured fungal mycelium

Figure 5.22a. Electron microscopic view of fungal EPS (a) and heavy metal treated fungal EPS (b)

Figure 5.23a. Electron microscopic view of heavy metals (Pb and Cd) treated fungal mycelium

Figure 5.23b. EDEX image of heavy metals (Pb and Cd) absorption by fungal mycelium

Figure 5.23c. Electron microscopic view of heavy metals (Pb, Cd and Hg) absorption by fungal mycelium

Figure 5.23d. EDEX image of heavy metals (Pb and Cd) absorption by fungal mycelium

Figure 5.23e. Electron microscopic view of heavy metals (Pb, Cd and Hg) absorption by fungal EPS

Figure 5.23f. EDEX image of heavy metals (Pb, Cd and Hg) absorption by fungal EPS

Figure 5.23g. Electron microscopic view of heavy metals (Pb, Cd) absorption by fungal EPS

Figure 5.23h. EDEX image of heavy metals (Pb, Cd) absorption by fungal EPS

Figure 5.24a. Fourier transform infrared spectrum of untreated EPS, Pb-loaded and Cd-loaded fungal EPS (a) and mycelial biomass, Pb treated mycelial biomass and Cd treated mycelial biomass (b).

Figure 5.25. Flocculating activity and flocculating rate of EPS concentration with kaolin suspension (a) and MgO suspension(b)

Figure 5.26. Antimicrobial activity test of *Aspergillus Penicillioides* (F12) fungal extract

Figure 5.27a. Dendrogram of water quality parameters with fungal count in pre-monsoon season

Figure 5.27b. Dendrogram of water quality parameters with fungal count in monsoon season

Figure 5.27c. Dendrogram of water quality parameters with fungal count in post-monsoon season
