Abstract . . . . .	v
Declaration . . . . .	vii
Acknowledgement . . . . .	ix
Contents . . . . .	xi
List of Tables . . . . .	xv
List of Figures . . . . .	xvii
List of Plates . . . . .	xxiii
List of abbreviations . . . . .	xxv
<b>1 FOUNDATION OF THE RESEARCH</b>	<b>1</b>
1.1 Introduction . . . . .	2
1.2 Location and significance of the study area . . . . .	7
1.3 Modern coastal process . . . . .	14
1.3.1 Physical process . . . . .	14
1.3.2 Hydrological process . . . . .	15
1.3.3 Biological process . . . . .	16
1.4 General topographic description of the islands . . . . .	17
1.5 Spatio-temporal variation of vegetation . . . . .	23
1.6 Future threats to the low lying islands . . . . .	35
1.7 Literature review . . . . .	37
1.8 Research gap and research questions . . . . .	43
1.9 Objectives of the present study . . . . .	44
1.10 Materials and methods . . . . .	44
1.10.1 Materials used . . . . .	46
1.11 Methodology . . . . .	49
1.11.1 Analysis of DEM and images . . . . .	49
1.11.2 Soil data analysis . . . . .	51
1.11.3 Field analysis . . . . .	53
1.11.4 Statistical analysis . . . . .	53

---

<b>2</b>	<b>GEOMORPHIC SETTINGS OF THE ISLANDS</b>	<b>67</b>
2.1	Contour plans of the Henry's and Patibania islands . . . . .	68
2.2	Classification of geomorphic settings . . . . .	72
2.3	Ecosystem functions of the geomorphic settings . . . . .	79
2.4	Tidal flat settings . . . . .	90
2.5	Saltmarsh vegetation and biogeography . . . . .	94
2.6	The role of sedimentation and saltmarsh maintenance . . . . .	97
2.7	Evolution of saltpan formation . . . . .	98
2.8	Geomorphic settings of estuaries and tidal channels . . . . .	106
2.9	Geomorphic settings and ecosystem functioning of mangrove shores . . . . .	113
2.10	Impact of sea level change in the island . . . . .	115
2.11	Mangrove response to sea level change . . . . .	117
<b>3</b>	<b>COASTAL ENVIRONMENTS AND REGIONAL SETTINGS OF THE ISLANDS</b>	<b>121</b>
3.1	Regional settings . . . . .	122
3.2	Climate variabilities . . . . .	124
3.2.1	Increasing temperatures . . . . .	125
3.2.2	Rising sea levels . . . . .	125
3.2.3	Cyclones . . . . .	126
3.2.4	Rise in salinity . . . . .	127
3.3	Coastal morphodynamics . . . . .	127
3.4	Sea level variations in the Holocene Period . . . . .	129
3.5	Sediments and island system . . . . .	131
3.6	Tides and waves as physical drivers of the coastal environment . . . . .	134
3.7	Coastal hazards: storms and floods . . . . .	139
3.8	Beaches and bars . . . . .	143
3.9	Coastal sand dunes and habitat diversity . . . . .	147
3.10	Coastal groundwater system . . . . .	150
3.11	Human influences in the islands . . . . .	151
3.12	Regional changes in shoreline configuration . . . . .	153
<b>4</b>	<b>ENVIRONMENTAL ASSESSMENT AND PHYSIOGRAPHIC SETTINGS</b>	<b>157</b>

4.1	Sediment textural analysis of tidal flats, saltmarshes, mangrove swamps, salt-pans, sea beaches, sand bars and sand dunes . . . . .	158
4.2	Chemical analysis of soil and water of the salt pans, saltflats, salt ponds, tidal channels . . . . .	162
4.3	Chemical analysis of soil chemicals in saline blanks . . . . .	164
4.4	Variation in growth and diversity of mangroves . . . . .	185
4.5	Areas of tidal inundation at different periods . . . . .	191
4.6	Impact of overwash process on the mangroves . . . . .	194
4.7	Bioturbation in the coastal sediments . . . . .	197
4.8	Changes in the shoreface environment . . . . .	201
4.9	Physiographic settings of mangroves and salt marshes . . . . .	206
4.10	Restoring of mangroves by eco-engineering process . . . . .	208
<b>5</b>	<b>HYDROLOGY AND REGIONAL CHANGES OF THE ISLANDS</b>	<b>211</b>
5.1	Rainfall characteristics . . . . .	212
5.2	Temperature variation . . . . .	216
5.3	Changes in relative humidity . . . . .	221
5.4	Evapotranspiration rate . . . . .	224
5.5	Mangrove forest cover areas of the islands with classes . . . . .	229
5.6	Relationship of mangrove forest cover area with climate . . . . .	234
5.7	Biomass estimation of mangroves . . . . .	240
5.8	Surface water storage and inundation by tides . . . . .	245
5.9	Groundwater recharge . . . . .	247
5.10	Drainage characteristics of the island systems . . . . .	249
5.11	Assessment of tidal prism in the islands . . . . .	253
5.12	Human consumption of freshwater in the islands . . . . .	255
5.13	Assessment of the water budget and mangrove ecosystem services in the islands	256
<b>6</b>	<b>COASTAL RESOURCE MANAGEMENT AND SUSTAINABLE DEVELOPMENT</b>	<b>261</b>
6.1	Forest management plan . . . . .	262
6.2	Fisheries management techniques . . . . .	267
6.3	Ecotourism development and sustainability . . . . .	271
6.4	Coastal resource management in the islands . . . . .	273

6.5	Coastal regulation zone . . . . .	275
6.6	Participatory methods of management in the coasts . . . . .	277
6.7	Increasing stress in the livelihood and adaptive measures in the coasts . . . . .	278
6.7.1	Livelihood adaption with changing climate . . . . .	281
6.8	Livestock population and management in the region . . . . .	283
6.9	Achieving the management of saltpans and salt flats . . . . .	284
	<b>Major findings</b>	<b>287</b>
	<b>Recommendations</b>	<b>291</b>
	<b>Concluding remarks</b>	<b>295</b>
	<b>References</b>	<b>301</b>
