SL No.	Contents	Page No
	Title Page	<i>i</i>
	Dedicated	<i>iii</i>
	Certification	<i>v</i>
	Abstract	<i>ix</i>
	Declaration	<i>xi</i>
	Acknowledgement	<i>xiii</i>
	Contents	<i>xv</i>
	List of Tables	<i>xix</i>
	List of Figures	<i>xxi</i>
	Abbreviations	<i>xxiii</i>
	Chapter 1 : Introduction	1-10
1.1	Overview	3
1.2	Background and motivation of study	4
1.3	Objective of the thesis	5
1.4	Scope of work	5
1.5	Overall research methodology	6
1.6	Novelties of the thesis	7
1.7	Organization of the thesis	8
1.8	Summary	10
	Chapter 2 : Literature Review	11-24
2.1	Overview	13
2.2	Forrest health Assessment	13
2.2.1	Forest health	13
2.2.2	Application of RS and GIS in forest health assessment	14
2.3	Identify local tree species and plant diversity estimation	16
2.3.1	Tree species classification and plant diversity estimating	16
2.3.2	RS and GIS application in tree species classification	16
2.3.3	RS and GIS application in tree species diversity	18
2.4	Foliar dust estimation and mapping	19
2.4.1	Foliar dust	19
2.4.2	RS and GIS application in foliar dust estimation	20
2.5	Forest health risk assessment and prediction	21
2.5.1	Forest health risk (FHR)	21
2.5.2	RS and GIS application in FHR assessment and prediction	23
2.6	Summary	23
	Chapter 3: Description of study area	25-36
3.1	Overview	27

3.2	Location of study area	27
3.3	Soil and geology	28
3.4	Geomorphology and LULC	29
3.5	Climate condition	30
3.6	Altitude and slope	31
3.7	Forest type and tree species	32
3.8	River, drainage pattern and watershed	33
3.9	Transportation and Settlement	34
3.10	Population	35
3.11	Natural resources	35
3.12	Agriculture and livelihood	36
3.13	Summary	36

Chapter 4 : Forest health assessment for geo-environmental planning and management in hilltop mining areas **37-62**

4.1	Overview	39
4.2	Data acquisition and pre-processing	39
4.2.1	Data Source	39
4.2.2	Field spectra data collection	39
4.2.3	Lab spectral data collection	41
4.2.4	Pre-processing of field and lab collected spectra data	41
4.2.5	Hyperion and Landsat-OLI data pre-processing	43
4.3	Methodology	44
4.3.1	VIs model for forest health analysis	44
4.3.2	Forest health spectra assessment	46
4.3.3	Classification techniques of forest health	47
4.3.4	Classification accuracy assessment	49
4.4	Results and Discussion	50
4.4.1	Health and unhealthy pixels detection based on VIs model	50
4.4.2	Forest health spectra assessment	53
4.4.3	Forest health classification and accuracy assessment	54
4.4.4	Relationship among DM, FH and FD concentration	57
4.4.5	Forest health validation	58
4.4.6	Discussion	59
	Summary	61

Chapter 5 : Assessment of mining activities on tree species and its diversity in hilltop mining areas **63-86**

5.1	Overview	65
5.2	Data acquisition and pre-processing	65
5.2.1	Data used	65
5.2.2	Identification of forest cover pixels	66
5.2.3	Local tree species of study area	67
5.2.4	Field survey and analysis	68
5.2.5	Acquisition and pre-processing of field spectra	69
5.2.6	Pre-processing of satellite data	69
5.3	Methodology	70

5.3.1	Tree species discriminant analysis	70
5.3.2	Spectral separability analysis of tree species	70
5.3.3	Data dimensionality and spectral similarity analysis	71
5.3.4	Tree species classification and accuracy assessment	71
5.3.5	Species diversity estimation based on narrow banded VIs	72
5.3.6	Relationship between SD, D-M, and concentration of FD	73
5.4	Results and Discussion	74
5.4.1	Tree species discrimination	74
5.4.2	Spectral separability of tree species	75
5.4.3	Data dimensionality and similarity	75
5.4.4	Tree species classification and accuracy assessment	77
5.4.5	Species diversity estimation and mapping	79
5.4.6	Relationship between SD, FD concentration and mines distance	81
5.4.7	Discussion	83
5.5	Summary	86

Chapter 6 :Assessment of foliar dust for environmental monitoring in an open cast iron ore mining areas 87-110

6.1	Overview	89
6.2	Data acquisition and pre-processing	89
6.2.1	Data used	89
6.2.2	Instruments used	89
6.2.3	Field survey	90
6.2.4	Laboratory experiment	92
6.2.5	Landsat and Hyperion data pre-processing	92
6.3	Methodology	93
6.3.1	Healthy and dust contaminated areas detection	93
6.3.2	Dust covered leaf spectra	94
6.3.3	Vegetation indices (VI_{diff}) for foliar dust estimating	94
6.3.4	VIs Differencing (VI_{diff}) Landsat and Hyperion images	95
6.3.5	VIs selection Landsat and Hyperion images	96
6.3.6	Foliar dust estimation and accuracy assessment	98
6.4	Results and Discussion	99
6.4.1	Field measurement of dust samples	99
6.4.2	Dust quality detection	99
6.4.3	Detection of healthy and pest inflicted defoliation pixels	100
6.4.4	Dust and seepage detection based on VIs combinations	101
6.4.5	Relationships between foliar dust and field Spectra	102
6.4.6	VI Differences and VI Selection	103
6.4.7	Foliar dust estimation in mining area	104
6.4.8	Relationship between distances and dust classes	106
6.4.9	Accuracy assessment	107
6.4.10	Discussion	108
6.5	Summary	110

Chapter 7 : Assessment and prediction of forest health risk for effective planning and management for mining affected forest area 111-134

7.1	Overview	113
-----	----------	-----

7.2	Data sources	113
7.3	Field observation	114
7.4	Data pre-processing	114
7.5	Causative factors of forest health risk	115
7.5.1	Climate factors	115
7.5.2	Geomorphologic factors	115
7.5.3	Forestry factors	116
7.5.4	Topographic factors	116
7.5.5	Environmental factors	117
7.5.6	Anthropogenic factors	117
7.6	Methodology	117
7.6.1	AHP (Analytical hierarchy process) model	117
7.6.2	Forest health risk (FHR) assessment and prediction in mines sites	120
7.6.3	Sensitivity Analysis	120
7.6.4	Statistical correlation of sensitive parameters	121
7.6.5	Comparison and validation	121
7.6.6	Relationship between FHR, distance from mines with foliar dust	121
7.7	Results and Discussion	122
7.7.1	Present and predicted factors	122
7.7.2	FHR assessment and prediction in mines surrounding sites	124
7.7.3	Identification of sensitive factors	126
7.7.4	Correlation of sensitive factors	127
7.7.5	Comparison and validation	128
7.7.6	Relationship between FHR, distances from mines with foliar dust	129
7.7.7	Discussion	130
7.8	Summary	132
Chapter 8 : Conclusions and recommendations for future scope of work		135-140
8.1	Overview	137
8.2	Conclusions	137
8.3	Future scope of work	139
Bibliography		141-156
Appendix		157-172
Publications		173-174
Author's Biography		175-176
